

UNIT –II Database System Architecture

Q1. Explain centralize & client server system in details

Or

- Explain centralize server system in detail.
- Explain client server system in details.

Q2. Explain in details server system architecture

Or

- Explain Transaction server system in details.

Q3. Explain Data Server System in details.

Q4. Explain parallel system in details.

Or

- Explain Parallel Database Architecture with all models.

Q5. What is Distributed Database system ? Explain with an example.
